

LG Spotlight

Exceptional grain quality

Nabim Group: Group 4

Market Options: UK Distilling & Feed

OWBM Resistance: Yes

Sowing Date: Normal & Late

Rotational Position: First Cereal & Second Cereal

Soil Type: Light Soils & Heavy Soils

LG Spotlight is a very high yielding feed wheat that offers exceptional grain quality; with a very high specific weight and a very stable Hagberg of 288. This is a unique characteristic in a soft wheat, combined with good sprouting resistance, offers growers a very secure variety when irregular weather patterns cause delays at harvest. LG Spotlight also has a good disease resistance package, OWBM resistance and stiff straw.

Strengths

- Very high yielding
- Very good specific weight
- Very high stable Hagberg falling number

- Good disease resistance profile
- OWBM resistant

Technical Information

Technical information for LG Spotlight is listed below:
