# SY Insitor

AB111-1011 x Hereford

**Maturity +1**

## Grain quality

Specific weight:  
78.3 kg

Hagberg Falling  
Number: 265

Protein content:  
10.7%

## Recommended seed rate:

September:  
275-325 seeds/m<sup>2</sup>

October:  
325-375 seeds/m<sup>2</sup>

November:  
375+ seeds/m<sup>2</sup>

## Exceptional yields throughout the UK

UK	E	W	N
105	104	105	[105]

## Robust disease & agronomics

Height (cm): 93

Lodging no PGR  
(1-9): 6

Lodging with PGR  
(1-9): 7

## Nitrogen advice:

A standard nitrogen input programme for a feed variety should be applied, typically 180 kg N/ha

## SY INSITOR

### AT A GLANCE

- The highest yielding hard group 4 feed wheat
- Outstanding yields across the whole of the UK
- Excellent performance on all soil types and all midlate drilling positions
- Excellent *Septoria tritici* resistance and good yellow rust resistance
- OWBM resistant
- Very high specific weight

**SY INSITOR** IS A TALLER VARIETY THAT SHOWS A VERY STRONG RESPONSE TO PGR
